Summary

Motivated IT undergraduate with a strong foundation in front end and backend development seeking a Full Stack Developer Intern position. Eager to apply technical skills in React, Node.js, and MongoDB while gaining real-world industry experience.

Experience

Orel It Pvt Ltd Maharagama,Sri Lanka

Associate Image Processor Sep 2025 – Oct 2025

• Processed and annotated large datasets (images/videos) to support AI and machine learning projects.

• Collaborated with cross-functional teams to meet strict deadlines while maintaining data accuracy above 98%.

• Gained experience with data labeling, quality assurance, and attention to detail, essential for software testing and backend validation.

VVH Solutions Piliyandala

Intern - Software Engineer Jan 2026 – Jul 2026

Key Responsibilities:

- Integrated UI/UX designs into responsive and functional frontend interfaces.
- Contributed to Flutter mobile application development and implementation of application features.
- Integrated Firebase services into mobile applications where required.
- Worked with Docker for containerized application development and environment management.
- Contributed to Server-Sent Events (SSE) integration to support real-time data updates and communication.
- Collaborated on frontend and mobile application development tasks and contributed to the implementation of software features.

Education

Sri Lanka Institute of Information Technology (SLIIT) Information Technology

Software Engineering Oct 2023 – Present

Projects

Homemade Product Buying and Selling Platform (MERN Stack)

- Developed a full-stack application with authentication, product listing, and order management features.
- Implemented a responsive design using Tailwind CSS to ensure mobile compatibility.
- Improved user experience by optimizing React components for faster load times.
- **Tech Stack:** React, Node.js, Express.js, MongoDB, Tailwind CSS.

QuickShare - Real-time Device Synchronization Tool

- Developed a zero-configuration, client-side application for instant data sharing across devices.
- Implemented real-time synchronization using Supabase Realtime channels.
- Created an intuitive interface for seamless cross-device data transfer while ensuring data remains temporary and in-memory for privacy.
- **Tech Stack:** React, Supabase Realtime, Tailwind CSS.

Customer Support Website

- Designed and developed a customer support web application to handle user queries and ticket management.
- Enabled users to submit support tickets and track status, while providing administrative functionality for efficient ticket resolution.
- **Tech Stack:** Java, JSP, Servlets, JDBC, MySQL, HTML, Tailwind CSS.

UntilX (Mobile Application)

- Built a customizable countdown app supporting events, reminders, and real-time UI updates.
- Implemented clean UI components and responsive layouts for a smooth user experience.
- Optimized app performance with efficient state management and reusable widgets.
- **Tech Stack:** Flutter, Dart.

CineTrack Pro (Electron Desktop Application)

- Developed a desktop application with automated directory scanning, watch progress tracking, and direct media player launching.
- Implemented a premium dark-theme glassmorphism interface using custom CSS to deliver a modern, fluid user experience.
- Optimized directory scanning and UI rendering algorithms to seamlessly manage local folders containing over 500 episodes without lag.
- **Tech Stack**: Electron, Node.js, JavaScript (ES6+), CSS3, HTML5.

Skills

Programming Languages: Java | Python | JavaScript

Frontend Development: HTML, CSS, React, Tailwind CSS, Flutter , NextJs

Backend Development: Node.js, Express.js, Java Servlets, JSP, Supabase

Databases: MongoDB, MySQL

Tools & Methodologies: Git, GitHub, VS Code, Postman, Agile, Scrum

Operating Systems: Linux (Ubuntu ,Cent OS),Windows

DevOps / Cloud: Docker , Kubernetes

Certifications

Python for Beginners – University of Moratuwa (2022)

Web Design for Beginners – University of Moratuwa (2022)

Front-End Web Development – University of Moratuwa (2025)

Server Side Programming – University of Moratuwa (2025)

Introduction to Software Engineering – IBM (2025)

Getting Started with Git and GitHub – IBM (2025)

Introduction to cloud computing – IBM (2026)
